Face Shield Assembly Instructions
in 2 easy steps

Step 1
Locate the Forehead Strap and snap into the adjustable strap fit slots.
This will help keep the face shield away from your face (compatible with glasses).

Step 2
Wrap the long plastic face shield belt around your head to measure which slot is right for you and insert the Fit Tab at that location. You may cut off excess belt if needed.

FACE SHIELDS PROVIDE ADDED PROTECTION
Shields help protect the entire face from flying debris, potentially infectious materials, spray, splatter and droplets.

- Full face coverage helps protect eyes, mouth, nose and ears
- Light and comfortable to wear
- Adaptable forehead band
- Adjustable for any head size
- Compatible with face mask and glasses
- Made from crystal clear recyclable PET anti-fog material
